Duodenal Ulcer. By B. G. A. Moynihan. Second edition, pp. 486; illustrated; cloth. W. B. Saunders & Co., Philadelphia and London, Publishers. Price, \$5.00.

In this second edition the size of the book has been increased from 379 to 486 pages, 115 new case histories and 15 illustrations have been added. The most important changes concern the chapters on Symptoms and Diagnosis and Differential Diagnosis. The brilliant investigations of Hertz on the sensibility of the alimentary canal have thrown light on much that was dark in the symptomatology of duodenal ulcer and have permitted of a satisfactory interpretation of the "hunger pains"—a phenomenon which at the printing of the first edition was still inexplicable. A discussion of X-Ray findings and the reproduction of X-Ray plates in subsequent editions would still further add to the interest of this classical monograph.

Health and Medical Inspection of School Children.

By Walter S. Cornell, M. D., Director of Medical Inspection of Public Schools, Philadelphia. Published by F. A. Davis Co., Philadelphia. 1912.

The possibilities of medical inspection in the public schools and its close relation to every sociologic problem are borne in on the reader as page after page of this fascinating book is turned. Excellent original illustrations emphasize the text, and throughout the note of conclusion from personal experience is sounded. The book is one to recommend itself to teachers, parents, and citizens who are interested in having the pupils in our public schools given every chance to secure and maintain trained minds in sound bodies as assets for future usefulness to themselves and the state. Actual facts as to the principles underlying proper school inspection, its costs, limitations, the amount each inspector can be expected to cover, and the qualifications of the inspectors will elucidate the demands of the situation to Boards of Health. All in all, the book is pertinent at this time and is a valuable contribution to preventive medicine.
